

Homework 3

MSAN 698, Diane Woodbridge

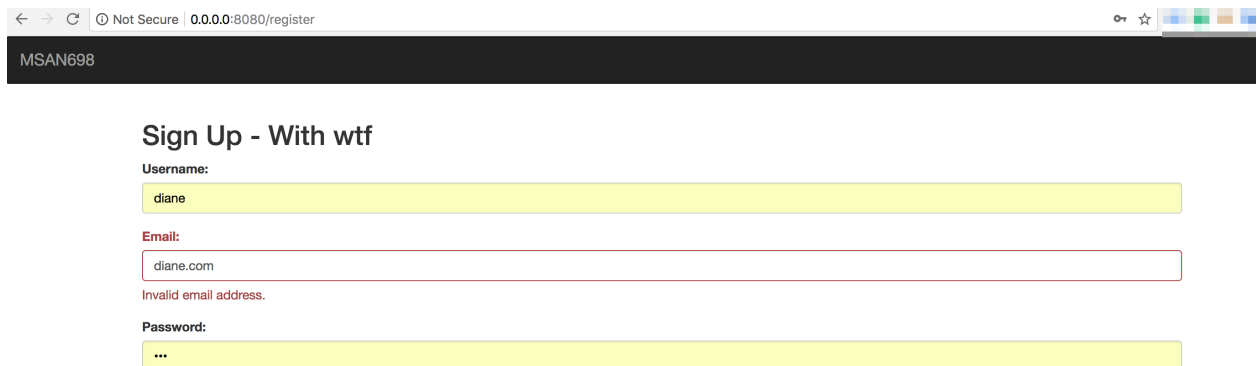

Due: April 27th, 10:00 AM

Description

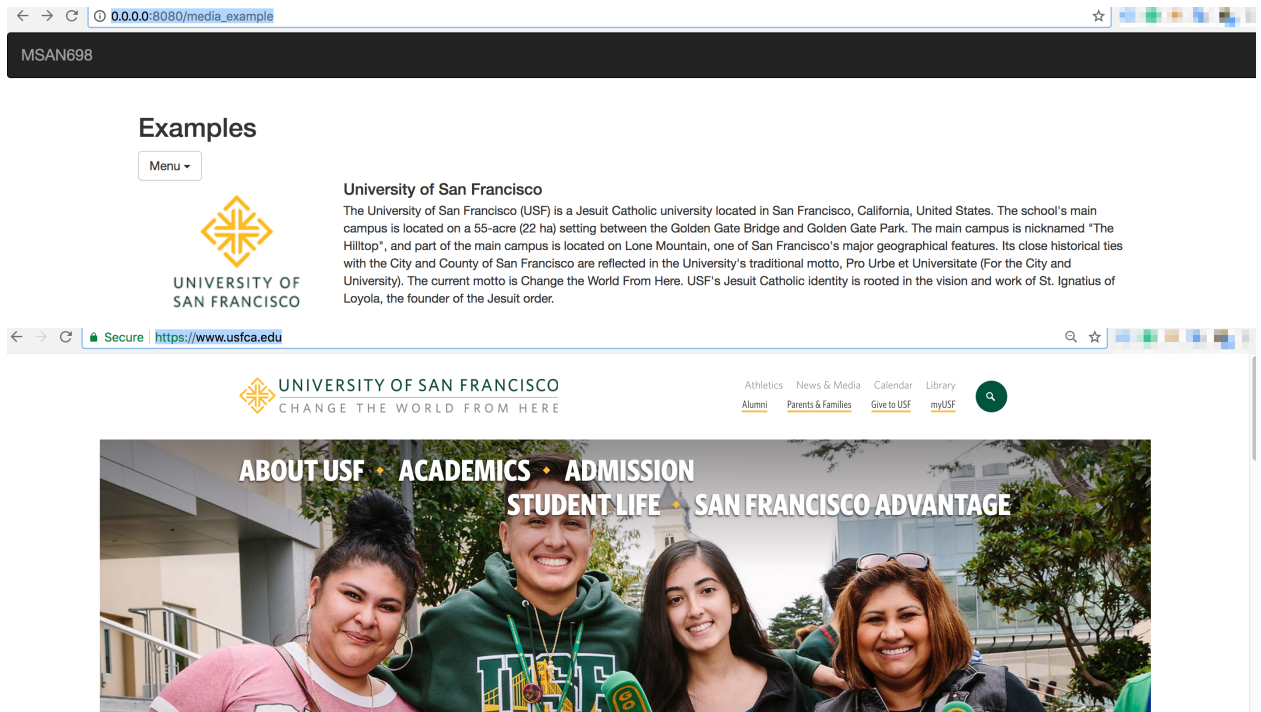

1. Include navbar.html into index.html. (0.5pt)
Test : Calling <http://0.0.0.0:8080/> should include a responsive navigation header (navbar) from navbar.html.

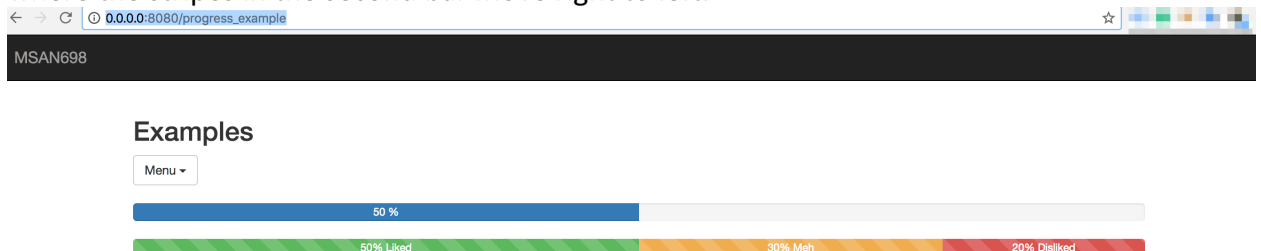

2. Make sure an entered email address in /register is valid (1pt).
Test : Calling <http://0.0.0.0:8080/register> and entering an invalid email address should return an error message.

3. Add a hyperlink (<https://www.usfca.edu/>) to the USF logo image on /media_example (1pt).
Test: Calling http://0.0.0.0:8080/media_example and clicking the image should take you to <https://www.usfca.edu/>

4. Add “active” in the second progress bar’s class in progress_example.html.
Test: Calling http://0.0.0.0:8080/progress_example should return two progress bars where the stripes in the second bar move right to left.

5. Update “hw3.py” to satisfy the PEP8 standards (0.5pt).
- The code should follow the standards covered in class including code layout, whitespaces, comments and naming conventions.
 - If you run `pycodestyle hw3_Woodbridge_Diane.py > output.txt`, the output (output.txt) should be an empty text file.

Submit the hw3.py file - the name of your file should be **hw3_Lastname_Firstname.py**.
Make sure it runs in **Python 3.6**.
